- English
- Igbo

Video Intro (Coming soon...)

Chinonye Nora Dim

A Strategic Operations Lead with a background in Computer Science and over 8 years of experience scaling teams—including growing a team from 6 to over 150. I work directly with founders, heads of organizations, and leadership to interpret their vision, design structural organograms, and build the operational systems that turn high-level strategy into seamless execution.

Experience

Feb. 2025 - Till Date

RUPTVATE

Operations Strategist

I provided consulting services focused on workflow optimization and organizational systems design for MSMEs. Built out the complete project charter for a solar and inverter installation training program, mapping out the whole strategic roadmap and financial targets from scratch. Plus, designed and delivered original Blockchain and Web3 training frameworks for over 40 participants, making complex tech concepts easy to grasp and highly credible.

Oct. 2025 - Jan. 2026

Virtual Mining & Construction Company ONE (VMCC ONE)

Senior Project Manager (Contract)

I acted as the strategic right-hand to the Founder, translating complex conceptual visions into the project's foundational operational framework. I authored comprehensive Structural Drafts, including organizational organograms and recruitment flowcharts, while designing the Partnership Liaison Officer Learning Pathway and strategic campaign plans for the RWA Blockchain initiative.

Dec. 2021 - Jan. 2025

Edo State Skills Development Agency – Benin City, Nigeria

Project & Training Lead

I stepped in as Project Lead to rescue a ₦39,000,000 community reintegration project, fixing audit compliance and keeping documentation so clean that stakeholders kept praising it at the start of every meeting—which made our team stand out and helped unlock a ₦50,000,000 follow-on project.

I mobilized on a 48-hour notice to successfully execute a high-stakes regional conference, earning an appointment to handle planning, logistics, and secretariat setup for the subsequent Human Capital Development Workshop—where I managed 75 government and NGO participants, updated workplans for a ₦37,300,000 ECOWAS-funded master plan, and delivered timely reimbursement documentation that ensured the project successfully held on and stayed active through a new government administration and transition.

I mapped key institutional networks to advise executive leadership on stakeholder management and secure vital access.

April. 2017 - Dec. 2021

Edo State Skills Development Agency – Benin City, Nigeria

Administrative & Financial Officer

I trained and supervised accounting staff while redesigning HR data forms to improve employee information accuracy. Played a key role in supporting the agency's growth and structure, as well as the successful execution of the EdoJobs Summit (2017), enhancing team collaboration and operational efficiency. Provided mentorship and administrative oversight for the Shared Services department, fostering staff development and streamlined workflows.
